The Bartle taxonomy of player types is a classification of video game players based on a 1996 paper by Richard Bartle according to their preferred actions within the game. The classification originally described players of multiplayer online games (including MUDs and MMORPGs), though now it also refers to players of single-player video games.. The taxonomy is based on a character theory.

Bartle taxonomy of player types - Wikipedia

The Four Temperaments or Four Humours continued to feature in the thinking and representations of human personality in the work of many great thinkers through the ages since these earliest beginnings, and although different theorists have used their own interpretations and descriptive words for each of the temperaments through the centuries, it is fascinating to note the relative consistency ...
