Constructing A Language Usage Based Theory Of Acquisition
Michael Tomasello
**Constructing A Language Usage Based**

Language is a system that consists of the development, acquisition, maintenance and use of complex systems of communication, particularly the human ability to do so; a language is any specific example of such a system. The scientific study of language is called linguistics. Questions concerning the philosophy of language, such as whether words can represent experience, have been debated at ...

Badaga is a southern Dravidian language spoken by approximately 135,000 people in the Nilgiri Hills of Tamil Nadu. It is known for its retroflex vowels. It has similarities with neighbouring Tamil-Kannada, and has now been identified as an independent language by a French linguistic scholar, Christiane Pilot-Raichoor. The word Badaga, meaning "northerner", refers to the Badaga language as well ...

Mexico is an urban nation, with around 75 per cent of its population living in urban areas (Heritage, 2004). From 1950 to 1980, rapid unplanned urbanisation occurred, mainly due to high levels of rural-urban migration accompanying industrialisation and economic growth (see Table 2). Faced with explosive urban growth, formal housing provision in Mexico has struggled to meet demand, leading to the ...

Early Theories. One of the earliest scientific explanations of language acquisition was provided by
Skinner (1957). As one of the pioneers of behaviorism, he accounted for language development by means of environmental influence.. Skinner argued that children learn language based on behaviorist reinforcement principles by associating words with meanings.
