Forensic Anthropology Study Guide
Forensic Anthropology Study Guide
Forensic science is the application of science to criminal and civil laws, mainly—on the criminal side—during criminal investigation, as governed by the legal standards of admissible evidence and criminal procedure. Forensic scientists collect, preserve, and analyze scientific evidence during the course of an investigation. While some forensic scientists travel to the scene of the crime...

Forensic science - Wikipedia
Forensic facial reconstruction (or forensic facial approximation) is the process of recreating the face of an individual (whose identity is often not known) from their skeletal remains through an amalgamation of artistry, anthropology, osteology, and anatomy. It is easily the most subjective—as well as one of the most controversial—techniques in the field of forensic anthropology.

Police - Crime-scene investigation and forensic sciences: The first police crime laboratory was established in 1910 in Lyon, France, by Edmond Locard. According to Locard’s “exchange principle,” it is impossible for criminals to escape a crime scene without leaving behind trace evidence that can be used to identify them. That principle gave rise to the forensic sciences, which are the ...
