Gender Goes Life By Marie

Gender is the range of characteristics pertaining to, and differentiating between, masculinity and femininity. Depending on the context, these characteristics may include biological sex (i.e., the state of being male, female, or an intersex variation), sex-based social structures (i.e., gender roles), or gender identity. Many if not most societies use a gender binary, having two genders, men ...

The social construction of gender is a theory in feminism and sociology about the operation of gender and gender differences in societies. According to this view, society and culture create gender roles, and these roles are prescribed as ideal or appropriate behavior for a person of that specific sex.. Some supporters of this idea argue that the differences in behavior between men and women ...
