

## *Green Building A To Z Understanding The Language Of Green*

### **Green Building A To Z**

Somewhere in 2009, I had an idea to devise a scheme to build a residential addition with just 2 people, and when necessary heavy equipment like forklifts, cranes, pump-jacks, and other material handling rigs. Some tasks became untenable, and I had to bring in specialized sub-contractors to get the job done quickly and safely.

Green Buildings have been identified by the City as a major component of its commitment to sustainable development. The City's initiatives through its strategic plan, commitment to Green Building of City facilities, and the adoption and phased implementation of the Eco-City Charter lay the foundations for the wider adoption of Green Building practice in the City of Alexandria.

A green roof or living roof is a roof of a building that is partially or completely covered with vegetation and a growing medium, planted over a waterproofing membrane. It may also include additional layers such as a root barrier and drainage and irrigation systems. Container gardens on roofs, where plants are maintained in pots, are not generally considered to be true green roofs, although ...

Green is the color between blue and yellow on the visible spectrum. It is evoked by light which has a dominant wavelength of roughly 495–570 nm. In subtractive color systems, used in painting and color printing, it is created by a combination of yellow and blue, or yellow and cyan; in the RGB color model, used on television and computer screens, it is one of the additive primary colors, along

The A-Z Index includes listings for specific campus departments, programs, offices and services, as well as general subject listings. Each office listing includes a link to the campus web page, if one exists, and the primary phone number, building and room number. If an office does not have a web page, the title will not serve as a link. In some instances, another SSU web page
