A robot is a machine—especially one programmable by a computer— capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed on the lines of human form, but most robots are machines designed to perform a task with no regard to how they look.

Robot - Wikipedia

Humans need to be able to recognize what a robot will do. Robotist Anca Dragan at the University of California, Berkeley, has argued that robots need to be able to communicate their intent to ...
