

## *Math Definition Of A Line*

### **Math Definition Of A Line**

In common language it is a long thin mark made by a pen, pencil, etc. In Geometry a line: • is straight (no bends), • has no thickness, and • extends in both directions without end (infinitely). One end makes it a "Ray", and two ends makes it a "Line Segment".

### **Line Definition (Illustrated Mathematics Dictionary)**

Definition Of Line. A Line is a straight path that is endless in both directions.

### **Definition Of Line - Mathematics Lesson Plans, Answer Math ...**

Drawing a line. If a line is not straight, we usually refer to it as a curve or arc. In plane geometry the word 'line' is usually taken to mean a straight line. If a set of points are lined up in such a way that a line can be drawn through all of them, the points are said to be collinear. See Collinear definition .

### **Line - math word definition - Math Open Reference**

The inclination of a line or angle of inclination is the acute or obtuse angle that is formed when a nonhorizontal line intersects the x-axis. Formal definition: The inclination of a nonhorizontal line is the positive angle  $\theta$  with  $\theta$  less than 180 degrees and measured counterclockwise from the x-axis to the line.

### **Inclination of a Line - Definition, Proof, and Examples**

lead line a purple-blue line at the edge of the gums in chronic lead poisoning; called also blue line.  
lip line a line on the teeth at the level to which the margin of either lip extends.  
median line an imaginary vertical line dividing the body equally into right and left parts.

### **Line (mathematics) | definition of Line (mathematics) by ...**

The part of a line that connects two points. It is the shortest distance between the two points. It has a length. Adding the word "segment" is important, because a line normally extends in both directions without end. But a line segment has definite end points ...

### **Line Segment Definition (Illustrated Mathematics Dictionary)**

Mathematics. a continuous extent of length, straight or curved, without breadth or thickness; the trace of a moving point. something arranged along a line, especially a straight line; a row or series: a line of trees. a number of persons standing one behind the other and waiting their turns at or for something; queue.
