A nuclear power plant or nuclear power station is a thermal power station in which the heat source is a nuclear reactor. As it is typical of thermal power stations, heat is used to generate steam that drives a steam turbine connected to a generator that produces electricity. As of 23 April 2014, the International Atomic Energy Agency (IAEA) reports there are 450 nuclear power reactors in ...

Thailand's dramatic economic growth has caused numerous environmental issues. The country faces problems with air declining wildlife populations, deforestation, soil erosion, water scarcity, and waste issues. According to a 2004 indicator, the cost of air and water pollution for the country scales up to approximately 1.6–2.6 percent of GDP per year.
