Zonomi - DNS hosting - Zonomi

DNS is comprised logically of Domains but physically of zones.. A domain is a logical division of the DNS name space whereas a zone is physical, as the information is stored in a file called a zone file.. In most cases you have a 1 to 1 relationship between a Domain and a DNS Zone i.e. the domain mydomain.com would be stored in a zone file called mydomain.com.txt.

DNS Zones and Zone Files Explained - Steve

Issues and delays caused by database performance networks are a timeand moneydrain IT teams can't afford. With so many performance risk factors at play (memory usage, indexing, etc.), it can be hard to determine where, when, and why a problem is occurring.
