Why Magnets Buddy - Promotional Magnets | Logo Magnets
General Magnet Questions. 1. How can I identify the poles of the magnets? 2. Is one pole stronger than the other? 3. Which is the strongest type of magnet?

K&J Magnetics - FAQ
A magnet is a material or object that produces a magnetic field. This magnetic field is invisible but is responsible for the most notable property of a magnet: a force that pulls on other ferromagnetic materials, such as iron, and attracts or repels other magnets. A permanent magnet is an object made from a material that is magnetized and creates its own persistent magnetic field.

Magnet - Wikipedia
The Yamanashi MLX01 MagLev train. Uses for Superconductors Magnetic-levitation is an application where superconductors perform extremely well.

Uses for Superconductors
Both the Neodymium Iron Boron and the Samarium Cobalt magnets are generally known as rare earth magnets since their compounds come from the rare earth or Lanthanide series of the periodic table of the elements. They were developed in the 1970’s and 1980’s. As can be seen in the table, these are the strongest of the permanent magnets, and are difficult to demagnetize.

What types of magnets are there? - Magnet Man - Cool ...
An electromagnet is a type of magnet in which the magnetic field is produced by an electric current. Electromagnets usually consist of wire wound into a coil. A current through the wire creates a magnetic field which is concentrated in the hole, denoting the center of the coil.

Electromagnet - Wikipedia
WV Vendors: Make the Switch to Electronic Payments! State Auditor John B. McCuskey is encouraging all vendors doing business with the State of West Virginia to receive payment through the state’s Electronic Funds Transfer payment system or accept the State Purchasing Card.

1. Introduction. Complex near net-shaped Nd 2 Fe 14 B (Nd-Fe-B) permanent magnets are desirable in numerous applications because they enable device miniaturization and weight reduction. Traditionally, bonded magnets are fabricated by either compression molding with a thermoset binder or injection molding with a thermoplastic binder. Also tooling dies used for conventional molding are expensive ...
