An alternative method from Japan in 2013 involved genetically modifying the silkworms to produce the dyes. Silkworms that eat carbon nanotubes and graphene spin tougher silk Researchers reported in 2016 a clever way to make the gossamer threads even stronger and tougher: by feeding silkworms graphene or single-walled carbon nanotubes (Nano Lett. 2016, DOI: 10.1021/acs.nanolett.6b03597).

Textile printing is the process of applying colour to fabric in definite patterns or designs. In properly printed fabrics the colour is bonded with the fibre, so as to resist washing and friction. Textile printing is related to dyeing but in dyeing properly the whole fabric is uniformly covered with one colour, whereas in printing one or more colours are applied to it in certain parts only, and ...

A safety vest is a type of apparel designed to keep the wearer visible and to designate authority. Safety vests, or 'hi vis vests' often feature high visibility or hi-viz colors like yellow/lime and orange. Silver reflective stripes on safety vests increase visibility, especially at night and in difficult weather conditions.
