Processing applications for tomato products - Tetra Pak

Staking and Pruning. Most commercial determinate tomatoes are produced using short stake culture for trellising. This type of culture produces fruits that are higher in quality and easier to harvest and enhances spray coverage.

Commercial Tomato Production Handbook - UGA Extension

The tomato is the edible, often red, berry of the plant *Solanum lycopersicum*, commonly known as a tomato plant. The species originated in western South America. The Nahuatl (Aztec language) word *tomatl* gave rise to the Spanish word *tomate*, from which the English word *tomato* derived. Its use as a cultivated food may have originated with the indigenous peoples of Mexico.

Tomato - Wikipedia

1. Introduction. In food processing industries, waste is produced from the separation of desired products from undesired by-products, .Such food industry wastes are product specific and therefore the composition of the waste does not vary significantly as the final product must have a consistent quality .Numerous efforts have been made to utilize the biodegradable fraction of food processing ...
